The public consultation on the EPR evaluation report has started

Today, the public consultation on the external parallel run (EPR) evaluation report started. The Nordic TSO:s welcome you to provide your input.

**Consultation period:** 17 April –17 May, 00:00 CET, 2023

**Consultation page:** [Nordic Capacity Calculation Methodology External Parallel Run Evaluation Report - European Network of Transmission System Operators for Electricity - Citizen Space \(entsoe.eu\)](#)

### Respond to the consultation no later than 17 May

The consultation is handled via a consultation page on the ENTSO-E website. You can find all the consultation documentation and contact information there.

Link: <https://consultations.entsoe.eu/markets/nordic-ccm-parallel-run-report/>

Please note that all input to the consultation must go via the dedicated consultation page. All responses must be submitted no later than 17 May 00:00 CET, 2023.

### Your input matters

The flow-based implementation process includes a quality control by the Nordic National Regulatory Authorities (NRAs), assessing an evaluation report of the external parallel run. Before the report is submitted, there is an open consultation, providing stakeholders with the opportunity to provide input on the report.

After the consultation period is closed, the Nordic TSOs will compile the input received, and use it to complete the report and submit it to the NRAs for assessment.

## Stakeholder meeting 3 May focuses on the consultation

The Nordic Capacity Calculation Methodology (CCM) project invites stakeholders to a meeting focusing on the consultation on 3 May, 09:30-15:30. This will be a hybrid meeting. Stakeholders can choose to participate either on-site at Oslo Gardemoen Airport, Norway, or online via Teams.

To participate on-site, please pre-register no later than 27 April. [Pre-register here!](#)

[Click here to join the Teams meeting!](#)

## New format to CCM Market report

From week 11 forwards, the weekly Market report will be condensed into two pages. The report still contain the same kind of information as before, but the format provides a better overview of the graphs and the relevant results. We hope it will give you easier access to the information. Please note that the Market report Annex remains unchanged.

The Nordic CCM Market report for week 11 is available for download at the Nordic RCC website: <https://nordic-ccc.net/wp-content/uploads/2023/04/CCM-EPR-market-report-week-11.pdf>

## New version of Phenomena report published

The Phenomena report has been updated. The new version has 11 April as revision date.

The updated Phenomena report is available for download at the Nordic RCC website: <https://nordic-rcc.net/wp-content/uploads/2023/04/Phenomena-report-revised-11-April.pdf>

## First version of CCM EPR Handbook published

On 31 March, we published the first version of the CCM EPR Handbook. The CCM project and Nordic RCC aim for the handbook to provide additional support to all stakeholders in utilising the data from the external parallel run (EPR) and to prepare for go-live of flow-based in the Nordics. Please note that this handbook will be updated and extended during the EPR.

The CCM EPR Handbook is available for download at the Nordic RCC website: <https://nordic-rcc.net/wp-content/uploads/2023/03/CCM-EPR-Handbook.pdf>
