

## Nordic CCM Market Report: 2023 Week 35

\*For more information on the EPR and other published data consult the EPR Handbook

### General Remark

This week sees an overall change for the Nordic CCR of 6.83 M€, a change of 0.70 M€ on the Hansa/Baltic border, and a change of 0.54 M€ for the external areas, resulting in a change of 8.07 M€ for the entire SDAC area.

The most significant price changes of the week occur in NO1, SE1, SE2, and NO4. The substantial relative increase in the price of NO1 is similar to last week, but higher in magnitude. The price increases in SE1-SE2 are likely linked to higher flows that FB enables between SE2 and SE3.

In addition, like week 34, FB manages to decrease the average prices in Finland. This results from FI being a high-price area both in FB and NTC during these weeks due to limited cross-border capacity and supply.

### Nordic CCR Socio-economic Welfare Result (M€)

	DK	NO	SE	FI	Sum
Congestion Income	-1.30	7.40	-21.04	-0.36	-15.31
