Nordic CCM Market Report: 2023 Week 34

*For more information on the EPR and other published data, please consult the EPR Handbook

General Remark

This week sees an overall change for the Nordic CCR of 11.42 M€, a change of -0.69 M€ on the Hansa/Baltic border, and a change of 1.17 M€ for the external areas, resulting in a change of 11.90 M€ for the entire SDAC area.
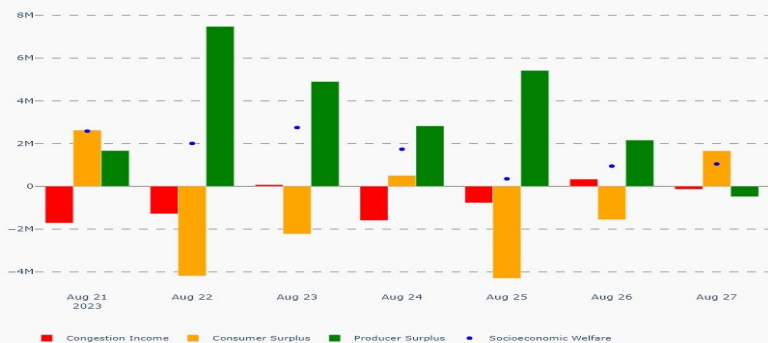

In the beginning of this week, Finland saw very high prices compared to the rest of the Nordic bidding zones, both in FB and NTC. Finland has been a low price zone recently, but is a high price zone for most of this week. This was due to several nuclear power plants being out and low wind production, in addition to large limitations in cross-border capacity in/out of Finland.

IVAs were provided on DK1-NL and Fennoskan on Monday, and on DK1_DK_IMP/EXP, Fennoskan, Kontiskan, SE2-NO3, NO5-NO1 and NO5-NO3.
