

Go-live of Nordic Flow-based Capacity Calculation delayed

The Nordic TSOs, NEMOs and RCC have jointly agreed to temporarily postpone the planned implementation of flow-based capacity calculation in the Nordic Region. A revised timeline for flow-based go-live will be issued in November 2023.

The reason for this delay lies in the unforeseen complexity in development and alignment of all the various IT systems and processes required to implement flow-based capacity calculation and allocation.

We are currently investigating the implementation timeline and External Parallel Run continuation, as well as other relevant dependencies to allow a re-planning of the flow-based timeline.

An update will be provided in early November.

Please direct any questions about this matter to Erik Ek, Chair of Nordic Flow-Based Implementation Project through the Svenska kraftnät press office. Phone: +46 10 475 80 10, E-mail: press@svk.se.
