

Nordic CCM Market Report: 2023 Week 43

*For more information on the EPR and other published data consult the EPR Handbook

General Remark

This week sees an overall change for the Nordic CCR of 1.91 M€, a change of 2.47 M€ on the Hansa/Baltic border, and a change of -2.17 M€ for the external areas, resulting in a change of 2.21 M€ for the entire SDAC area.

Sunday October 29th marked the move from daylight savings time to standard time, meaning that this day includes 25 MTUs. This shows up as double values or spikes in the net position time series of this report (and for net positions and flows in the appendix) at hour 2:00.

The substituted IGMs over the week concern Svk IGMs. F_AAC values for NTC on the October 29th for MTUs 1-18 are not correct for all AC-borders and the SE4-LT border. This is due to different deadlines for delivering capacity in NTC and FB. The maintenance was finalized earlier than expected and updated capacities were used in NTC. The issue will be further elaborated in the operational learning points document.

Nordic CCR Socio-economic Welfare Result (M€)

	DK	NO	SE	FI	Sum
Congestion Income	-0.53	3.06	-12.96	-1.10	-11.52
