

Nordic CCM Market Report: 2023 Week 45

*For more information on the EPR and other published data consult the EPR Handbook

General Remark

This week sees an overall change for the Nordic CCR of 11.78 M€, a change of -4.86 M€ on the Hansa/Baltic border, and a change of -1.79 M€ for the external areas, resulting in a change of 5.13 M€ for the entire SDAC area.

The SEW change is positive for every day this week both in the Nordic region and for the entire SDAC area. A large positive producer surplus change is seen this week where the largest contributions stems from SE2 and SE3 and also a negative consumer surplus that mainly is seen in SE3 and SE4.

There is on average an increased flow southwards in Sweden and increased flow from SE3->NO1 resulting in increased price convergence between Sweden and southern Norway.

Nordic CCR Socio-economic Welfare Result (M€)

	DK	NO	SE	FI	Sum
Congestion Income	-3.24	2.53	13.88	-0.31	12.87
