

10. EPR of FB ID: What could it be? If possible, how could it be done?

Nordic CCM Stakeholder Meeting
7 February 2024

Pieter Schavemaker

pschavemaker@e-bridge.com

Legal framework for ID FB EPR

- CACM Regulation Article 20(8)
“To enable market participants to adapt to any change in the capacity calculation approach, the TSOs concerned shall test the new approach alongside the existing approach and involve market participants for at least six months before implementing a proposal for changing their capacity calculation approach.”
- Approved CCM methodology
No specific requirement for ID FB EPR within methodology

TSOs are requested to have at least six months ID FB EPR before ID FB go-live

Note: FB on the ID timeframe is not foreseen to materialize before 2026

Question to the stakeholders

- We should compare current approach (i.e., ATCE) to the new approach (i.e., FB) for ID timeframe
- **Question: What kind of comparisons could be done by TSOs to help stakeholders familiarise with FB approach for ID timeframe?**
- It should be noted that ID FB EPR cannot be like DA FB EPR
 - Indeed, market outcomes cannot be compared, and socio-economic assessments cannot be performed

Process to get stakeholders views

- TSOs invite stakeholders to give their views, ideas and proposals how TSOs may support market participants to adapt to the change from ATCE to FB for ID timeframe
- Stakeholders are invited to **send their input by end of March 2024** to e-mail address: ccm@nordic-rcc.net
- TSOs will use the stakeholder input when planning the EPR for ID FB and come back with stakeholders with more concrete process for ID FB EPR in due time
