

Dear stakeholder of Nordic CCM,

Here is a news update from Nordic CCM. The news update is also available at the website: [Updates and newsletter - Nordic Regional Security Coordinator \(nordic-rcc.net\)](#)

**Reminder: Stakeholder meeting on 'FB for Beginners' 13 March, 08:30 - 12:30 CET: [Click here to join!](#)**

Join our online stakeholder meeting dedicated to interested stakeholders who are new to the flow-based world.

As this is an online meeting via Teams, no registration is necessary. [Just click here to join the meeting!](#) Please note that the online event will be video recorded and published to the social media platforms for future reference.

Agenda

08:30 – 09:45 Part 1: New capacity calculation – an introduction to Flow-based (including a 5-min break)

09:45 – 10:00 Break

10:00 – 11:30 Part 2: Flow-based market coupling for beginners (including a 5-min break)

11:30 – 11:45 Break

11:45 – 12:30 Part 2 continued: Results of external parallel run

**Reminder: Monthly stakeholder meeting on EPR results 14 March, 09:00 – 11:00: [Click here to join the meeting!](#)**

Please note that although the meeting is booked for two hours, it may end earlier depending on the discussions. As this is an online meeting via Teams, no registration is necessary. [Just click here to join the meeting!](#)

**Reminder: Stakeholder inputs for establishing an ID FB EPR**

The TSOs would like to invite stakeholders to give their views, ideas and proposals on how TSOs may support market participants to adapt to the change from ATCE to FB for the ID timeframe. Stakeholders are invited to send their input by end of March 2024 to the following e-mail address: [ccm@nordic-rcc.net](mailto:ccm@nordic-rcc.net)

TSOs will use the stakeholder inputs when planning the EPR for ID FB and come back with stakeholders with more concrete process for ID FB EPR in due time. For more information, please visit the [news update on 27 February 2024](#).

**New version of operational learning points published**

In this document the TSOs collect and explain the operational learning points we have encountered during the EPR. The document is to be updated continuously and the latest update was published 8 March 2024.

This version includes two new items: "FRM changed to 10% for certain Swedish CNECs" and "Outage in Finland on cut P1 handled differently in NTC than in FB".

Svenska kraftnät has identified the FRM of 5% on all Swedish CNECs not to be a sufficient marginal to manage all market outcomes. In order to ensure operational security, Svenska kraftnät increases the

FRM on 13 certain CNECs to 10%, starting from the 26th of February 2024. The topic will be presented in the next monthly online stakeholder meeting on EPR results (14 March, 9-11 CET) while the latter was already presented in the previous meeting (15 February).

This version of operational learning points also includes updates to the following existing findings: "Countertrade (SE) only included in NTC" and "Modelling of series capacitors on SE2-SE3".
