

Nordic CCM Market Report: 2024 Week 6

*For more information on the EPR and other published data consult the EPR Handbook

General Remark

This week sees an overall change for the Nordic CCR of -0.19 M€, a change of 0.20 M€ on the Hansa/Baltic border, and a change of -0.14 M€ for the external areas, resulting in a change of -0.13 M€ for the entire SDAC area.

This week showed a negative socio-economic welfare, both in the Nordic region and the entire SDAC area. The negative results primarily came from limitations on cut 2 in Sweden (SE2-SE3) and the Sauda transformers in southern Norway.

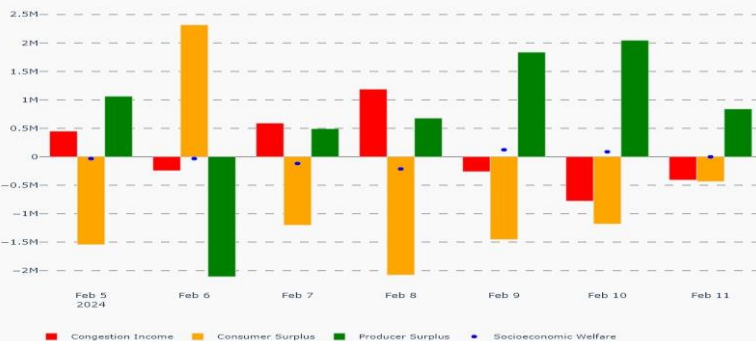

For cut 2, there were hours where the forecast of the grid situation differed from the real outcome. Thus, the configuration of the series capacitors differed between FB and NTC, allowing for higher flow in NTC. This will improve after go-live and is further elaborated in the operational learning points document.

For the Sauda transformers, the negative SEW comes from hours of import from the continent on the 6th of February, where NTC allows for higher flows that will require countertrading in operation.

Nordic CCR Socio-economic Welfare Result (M€)

	DK	NO	SE	FI	Sum
Congestion Income	-0.01	-2.09	2.56	0.07	0.54
Consumer Surplus	-0.11	-1.01	-1.87	-2.57	-5.57
Producer Surplus	-0.01	3.79	-0.94	2.00	4.85
Sum	-0.13	0.69	-0.25	-0.50	-0.19
