

# Nordic CCM Market Report: 2024 Week 13

\*For more information on the EPR and other published data consult the EPR Handbook

## General Remark

This week sees an overall socio-economic change for the Nordic CCR of 1.61 M€, a change of -1.02 M€ on the Hansa/Baltic border, and a change of 0.23 M€ for the external areas, resulting in a change of 0.82 M€ for the entire SDAC area. Both in the Nordic region and SDAC sees a positive total SEW for each day during this week.

Overall there are relatively few internal constraints and low shadow prices this week within the Nordic area in both FB and NTC. Southern Norway, Finland and Denmark are seeing higher prices than Sweden and NO4. This price difference is being reduced in FB. The flows from northern Nordics to southern Nordics and SE3 to NO1 & DK1 are increased and consequently we see a decreased price difference.

On Thursday and Friday, a CNEC for the Sauda transformer is binding and therefore limiting the import in FB from the continent to southern Norway. Similar situations have occurred previous weeks and more information on this topic can be found in the Operational Learning Point document.

## Data Quality

	25/03 Mon	26/03 Tue	27/03 Wed	28/03 Thu	29/03 Fri	30/03 Sat	31/03 Sun
