

Nordic CCM Market Report: 2024 Week 15

*For more information on the EPR and other published data consult the EPR Handbook

General Remark

This week sees an overall change for the Nordic CCR of 0.71 M€, a change of 3.16 M€ on the Hansa/Baltic border, and a change of -0.18 M€ for the external areas, resulting in a change of 3.69 M€ for the entire SDAC area.

This week shows positive SEW both in the Nordic region and the entire SDAC area. FB increases the flow from low-price areas in Sweden to higher-price areas in Norway and Denmark having a leveling effect on the prices. There are no distinct negative or positive SEW peaks during the week, except a positive peak on Sunday evening when the prices in Sweden and Finland are slightly negative in NTC. In this situation, FB moves more flow from these areas to Norway and Denmark compared to NTC.

One of the main contributions to the hours with negative SEW comes from a CNEC on the SE2-SE3 border in Sweden. This CNEC is limiting too much in FB due to a problem in the modeling of series capacitors in FB. More on this subject can be read about in the Operational Learning Points document as this has occurred previously as well.

Nordic CCR Socio-economic Welfare Result (M€)

	DK	NO	SE	FI	Sum
Congestion Income	-0.38	0.11	-0.20	0.21	-0.27
Consumer Surplus	2.35	3.99	-11.65	-5.39	-10.70
Producer Surplus	-4.44	-3.27	14.57	4.81	11.67
Sum	-2.47	0.82	2.73	-0.37	0.71
