

1. Welcome and opening words

Nordic CCM Stakeholder Meeting

10 June 2024

Pieter Schavemaker

pschavemaker@e-bridge.com

Meeting guidelines (for physical participants)

- To comment or pose a question you can either
 - Raise your hands after the presentation
 - Write in the “CHAT” window
 - Your questions or comments will be discussed during and/or after the presentation.
- When speaking, please start by identifying yourself.

In order to ensure technical quality in the meeting we ask all attendees to adhere to the meeting guidelines.

Meeting guidelines (for online participants)

- Please turn “OFF” your microphone and camera by default
- To comment or pose a question you can either
 - Write in the “CHAT” window.
 - Use the “RAISE-HAND” feature in MS Teams.
 - Your questions or comments will be discussed during and/or after the presentation.
- When speaking, please
 - Turn you microphone and camera “ON”
 - Start by identifying yourself.
 - Remember to turn your camera and microphone “OFF” afterwards.

In order to ensure technical quality in the meeting we ask all attendees to adhere to the meeting guidelines.

Please provide feedback!

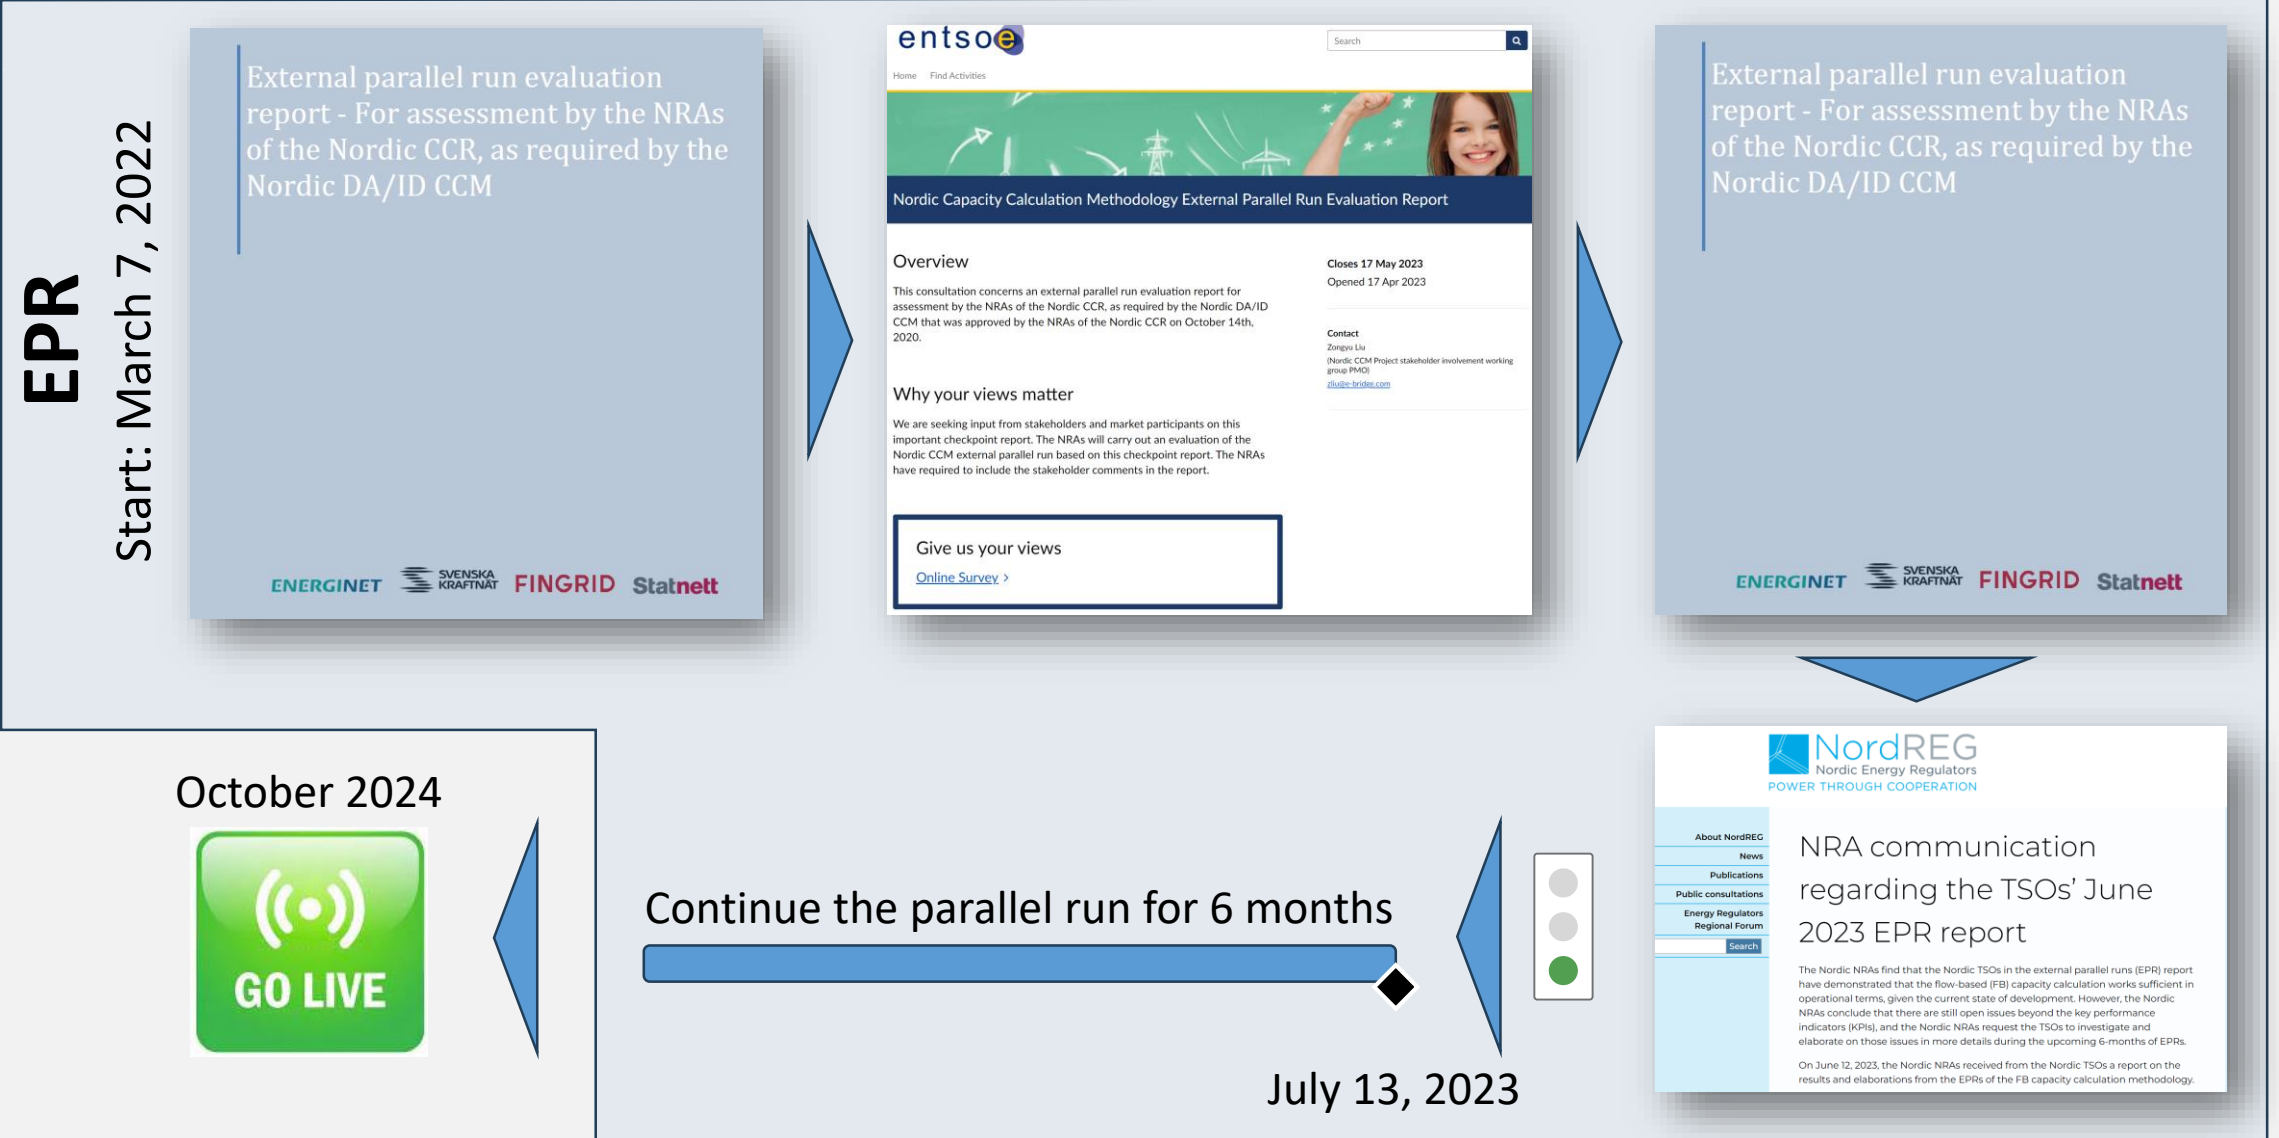

During the meeting

- This stakeholder event will not be recorded
- Questions and comments will be noted during the meeting and answers provided directly if possible
- Answers to remaining questions and comments will be provided “to all” after the meeting

Questions or comments after the meeting

- E-mail us at ccm@nordic-rcc.net

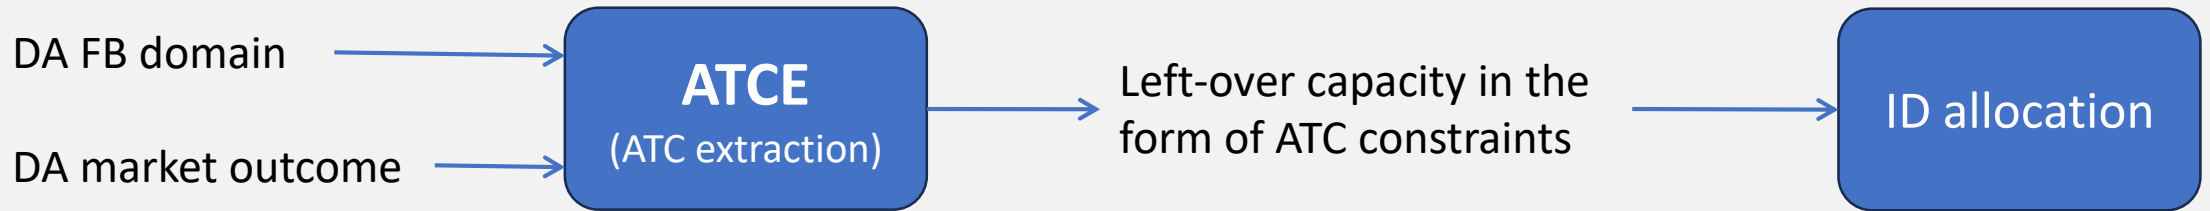

Where do we come from and where are we now?

Where do we come from and where are we now?

Focus on the ID ATCE

- The ATCE is an optimization procedure, to maximize the capacity for the ID market from the left-over DA FB capacity
- A relaxation of the FB domain is needed to find a solution
- The original relaxation applied was (intentionally) generous, but raised concerns at the TSO operators as there would not be sufficient time during the validation to reduce the capacities where needed to safeguard the operational security
- The relaxation has now been adjusted, to strike the balance between market facilitation and operational security, which required an update of the industrial tool as well

Where do we come from and where are we now?

Focus on the ID ATCE results

- The historical rerun of data was published for all weeks from week 26, 2023 to week 12, 2024 in W17
- As of W13 the ID ATCE have been published as part of the regular EPR process
- A newsletter was published as well, to explain the relaxation parameters used and the status on the ID ATCE
