

Nordic CCM Market Report: 2024 Week 22

*For more information on the EPR and other published data consult the EPR Handbook

General Remark

This week sees an overall change for the Nordic CCR of -1.52 M€, a change of 8.04 M€ on the Hansa/Baltic border, and a change of -0.59 M€ for the external areas, resulting in a change of 5.93 M€ for the entire SDAC area.

The negative Nordic SEW primarily comes from a shift from internal Nordic congestion income to congestion income on the Hansa borders. This is a consequence of higher flows from the north to the south of the Nordics, so the price difference moves from inside the Nordics to the Hansa border.

In terms of data quality, all IVA provisions were due to different mistakes in the input data.

Data Quality

	27/05 Mon	28/05 Tue	29/05 Wed	30/05 Thu	31/05 Fri	01/06 Sat	02/06 Sun
