

# Nordic CCM Market Report: 2024 Week 24

\*For more information on the EPR and other published data consult the EPR Handbook

## General Remark

This week sees an overall change for the Nordic CCR of -8.17 M€, a change of 4.12 M€ on the Hansa/Baltic border, and a change of -0.33 M€ for the external areas, resulting in a change of -4.38 M€ for the entire SDAC area.

The change in SEW for this week is the largest in the beginning and middle of the week and in the later part the change is smaller. In the end of the week the prices in Continental Europe are low due to large production from wind and solar, and the Nordics are importing power during daytime.

The most limiting CNECs this week are located in DK1 and limits the FB domain which also impacts the SEW. The explanation for this is included in the "Operational learning points" document.

## Nordic CCR Socio-economic Welfare Result (M€)

	DK	NO	SE	FI	Sum
Congestion Income	0.26	-1.29	-8.09	-0.89	-10.01
