

Upcoming stakeholder events

Online stakeholder meeting on EPR results 24 October, 09:00 – 11:00 CET: [Click here to join!](#)

Join our monthly online stakeholder meeting focused on elaborating EPR results of week 35 – 38.

This will be the last online stakeholder meeting on EPR results before go-live of Nordic Flow-Based Day Ahead Market Coupling on October 29th, 2024. We warmly welcome you to join us and ask questions during the event. To help us provide the best possible answers, feel free to send your questions in advance to ccm@nordic-rcc.net. Preferably before 21/10. After the go-live, you can continue to reach out with any questions at the same email address, and we'll be happy to assist.

Although the meeting is booked for two hours, it may end earlier depending on the discussions. As this is an online meeting via Teams, no registration is necessary.

FB domain forecasting workshop, date TBA

During the Nordic CCM stakeholder event on September 9th, stakeholders expressed challenges and issues regarding the FB domain forecast. In response, the TSOs would like to facilitate a dedicated workshop to address these issues and explore potential solutions. The workshop is tentatively scheduled for mid to late January 2025 and will be open to all stakeholders, encouraging broader participation and a productive exchange of ideas.

We would like to invite stakeholders to present your insights on this topic as solution providers. If you are interested in presenting, feel free to send an email to ccm@nordic-rcc.net before 15 November.

Post go-live online stakeholder event, 5 February, 09:00 – 12:00 CET: [Click here to join!](#)

The TSOs invite the stakeholders to join the online event on 5 February. As this is an online meeting via Teams, no registration is necessary.

This meeting will focus on post-go live reflections from TSOs and stakeholders. A draft agenda will be shared with you shortly. As valued stakeholders, if you are interested in sharing your operational experience regarding the transition from NTC to FB, we warmly invite you to indicate your interest inpening via email to ccm@nordic-rcc.net before 29 November and submit your presentation material to the same email address before January 22.

Future arrangement of stakeholder events

After go-live, there will be no bi-weekly/monthly EPR result elaboration SH events. The TSOs advise the stakeholders to focus on the production data instead. The useful links are listed at the end of the news update.

NRA report on ID

On July 1, the Nordic TSOs received a letter from NordREG: “... NordREG would therefore request the Nordic TSOs to assess and investigate the ID ATCE approach and the risks more thoroughly, and report to the regulatory authorities on how the described issues and risks could be minimized or corrected... NordREG requests the TSOs to deliver a report to NRAs within 3 months after receiving this letter.”

[NordREG Letter to Nordic TSOs on ID ATCE - Final 20240701](#)

To respond to the NRA request, the Nordic TSOs drafted a report on the functioning of ATCE, where the two questions related to ATCE functioning are placed in the Annex 1 and 2.

Previous stakeholder meeting material

The presentations and minutes of the stakeholder meetings on September 9 and 26 are available on the Nordic RCC website. <https://nordic-rcc.net/flow-based/stakeholder-meeting-material/>

Links for more information

Please regularly visit the following websites to access the EPR information and results.

Flow-based capacity calculation results (accessible until the 29/10): <https://test-publicationtool.jao.eu/nordic>

Market reports, phenomenon report and ID gate opening results and other relevant EPR data: <https://nordic-rcc.net/flow-based/simulation-results/>

General updates and newsletters: <https://nordic-rcc.net/updatesnewsletters/>

Questions and answers: <https://nordic-rcc.net/flow-based/questions-answers/>

Please regularly visit the following website to access the production results.

Flow-based capacity calculation results/ the JAO production tool is available: <https://publicationtool.jao.eu/nordic/>

The production tool will only be populated with data after the FB go-live on October 29, 2024. The change from the old to the new production tool only means a change in the URL, and the layout reflects the test tool. For this reason, no testing is foreseen necessary.

Please also note that the parallel run environment will be available under <https://parallelrun-publicationtool.jao.eu/> only after the go-live, i.e. the EPR results are accessible on this webpage from 29/10 on.
